Why should the quality end on the floor?

After all, the experience is perfect only with a matching Döllken skirting board.

For durable LVT coatings there is only one choice: robust and quick to install skirting boards by Döllken-Weimar.

Döllken-Weimar Multimedia Assistant

NEW

Whether at home or on the move, the new Döllken-Weimar website is now optimized for mobile use. On our new platform you will find helpful information as well as tips and tricks about the use of skirting boards. Use our improved product and decor finder as well to quickly find the right skirting board for your requirements.

Ecology

Döllken is a manufacturer of health-friendly skirtings boards. Döllken-Weimar certifies its offering in accordance with demanding GREENGUARD GOLD standards covering low-emission products.

Housing and construction products that emit volatile organic compounds may lead to serious health issues.

GREENGUARD standards, recognized worldwide, are a good reference point when choosing low-emission products, and therefore healthy alternatives. Döllken-Weimar is the first manufacturer of skirtings, whose entire inventory is certified according to the restrictive guidelines of GREENGUARD GOLD.

For many years it has been commonplace to use plastics in the construction industry and in interior architecture. Testament to this are varied application fields, easy processing, long lifetime and good pricing. On the other hand, plastics often contain components that are potentially or actually harmful to health. The main areas of concern include vapours of volatile organic compounds, i.e. the so-called VOCs. They pollute the air in the room and may cause such illnesses as headaches, diseases of the respiratory system, eyes, nose, throat, or even cancer.

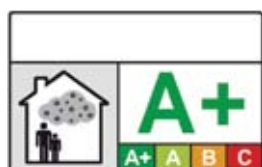

As a manufacturer of high-quality plastic products, such as skirtings and floor profiles, we treat this kind of issue very seriously. As the leading manufacturer in the industry, we have borne high costs in order to strictly test our products and receive the GREENGUARD certificate for low-emission products.

However, Döllken-Weimar was not satisfied with "standard" GREENGUARD testing, but opted instead for the highest level of testing called GREENGUARD GOLD. This option includes additional factors influencing security of particularly sensitive social groups, such as children or the elderly. Buyers responsible for selecting products for pre-schools, schools, health service facilities, and other clean facilities will always make the right choice by selecting our product. Using our products, one may create solutions that establish a good atmosphere. Using our products means creating a good, healthy atmosphere in rooms.

Appropriate research proves that air in closed rooms is often more polluted than the air outside, and most people spend 90% of their day in rooms. Since 2001, this issue has been addressed by the American Greenguard Environmental Institute (GEI). Standards defined by this institute strictly determine allowable densities for over 360 volatile organic compounds, as well as the allowable total value of all chemical emissions. These standards specify the highest levels for air quality in rooms, and their low-emission certificate is recognized worldwide.

Our products are tested using state-of-the-art technologies, such as high-performance chromatography, gas chromatography or mass spectrometry. The requirement for retaining this certificate is to regularly conduct and verify tests, our product range.

Be professional safe time and money

Döllken floor skirtings and profiles are ideally fit the requirements of professional floor fit-out works:

- **50% less work**

With Döllken tools you save half of your working time in comparison to conventional installation of foiled MDF skirtings, stamping, gluing - finishing.

- **Double cost advantage**

You save time during installation and can simultaneously achieve higher selling prices due to better product quality.

- **Complaints are a thing of yesterday**

No breaks, cuts or cracks in the skirting surface (not even on the corners). This means that no complaints arise from damaged or leaking corners and edges.

- **Perfect appearance without breaks**

Perfect optical results without unsightly fittings or accessories. No repainting or silicone required for the joints and corners. Clean working without dirt and chips.

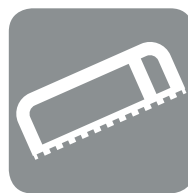

Our recommendations regarding installation are presented in the form of pictograms:

A convincing solution

Döllken solidcore skirtings are a one-of-a-kind solution. High-quality pine wood fibre cores with a FSC certificate are encased in resistant polymer, which guarantees their exceptional reliability. Döllken plinth blocks are particularly environmentally friendly and have a wide range of environmental certificates, e.g. GREENGUARD GOLD. They are extremely easy to use, and their installation helps save you time. All types of solidcore skirtings are subject to professional installation using system tools that do not require complicated, expert training courses.

1 package = 10 x 2,50 m

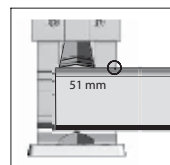

- HDF core encased in a chlorine-free PP/TPE polymer with flexible edges in top and bottom parts
- the colour is a perfect fit (structure and decor) with the floor
- professional finish of the profile thanks to the functional use of a Mitre tool
- possibility of using any colour from the RAL palette for special orders from 500 running metres
- joint range 13-15 mm

Instructions for cutting finishing trims.

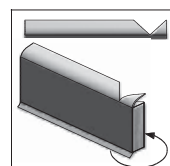

The EP 60/13 skirtings board does not require any additional accessories. Simple finishing trim using the Döllken Mitre tool. Perform the following actions:

1. The skirtings board should be longer by 11 mm, then measure 51 mm from the end of the skirtings board.

2. Cut the skirtings board according to item 1.

3. Assemble the end and apply adhesive.

Aesthetic and practical properties of the Cubu flex life plinth block form its substantial advantages in comparison with foiled MDF skirtings boards.

The Cubu flex life skirtings board is also available on the market made using a unique flocking process.

The most important advantages:

- quick and easy assembly using a Döllken Mitre tool and hot-melt adhesive. The Mitre tool creates a perfect internal and external angular profile, therefore it doesn't require any additional accessories
- assembly using Döllken hot-melt adhesive
- option to manufacture any RAL-palette colour on request from 1000 running metres

Design highlight for every floor

The Cubu flex life Premium skirting boards combines an outstanding genuine metal look with excellent installation features. With their precious metallic design e.g. copper, chrome or brushed stainless steel, they are suitable as a highlight and complement to various luxury floor tiles and laminate floors.

Fast installation due to the Döllken system tools*

The Cubu flex life Premium model can be die-cut. Edges and end caps can be formed directly from the skirting board. This method is not only quick but also visually appealing, since there are no breaks caused by open cutting edges, no silicon or moulded parts used.

Made of HDF core, a chlorine free full PP casing and SOFT PROTECTIVE RUBBER EDGES at the top and the bottom. They feature a genuine metal film finish. These are special impregnated papers, fully covered in stainless steel or copper

System floor skirtings

Attractive and intelligent

Elegant shapes and practical details

Cover strips EL 3,5, EL 8, HK 15/15, 20/20, 25/25, and HK 100 Basic can be found now in the section on floor and special profiles on pages 51-62.

System skirtings boards arouse delight with their elegant look and unique properties. They include wide cable ducts, removable and replaceable decorative profiles, and they facilitate long-term renovations without the need to completely disassemble and replace skirtings boards.

1 package = 18 pcs.

- floor and decorative Velsani skirtings are manufactured using a strong HD polymer
- besides their high resistance to shock, Velsani skirtings boards are also water resistant, which enables their use in facilities with high humidity and direct contact with water.
- special trimming of skirtings boards enables their quick installation using adhesive, and hiding cables.
- the skirtings boards can be painted using acrylic and water-based paints.

Fit-out accessories:

Universal post

1 package = 1 pc.

Flexible floor skirtings

Walls and floors are in harmony with each other

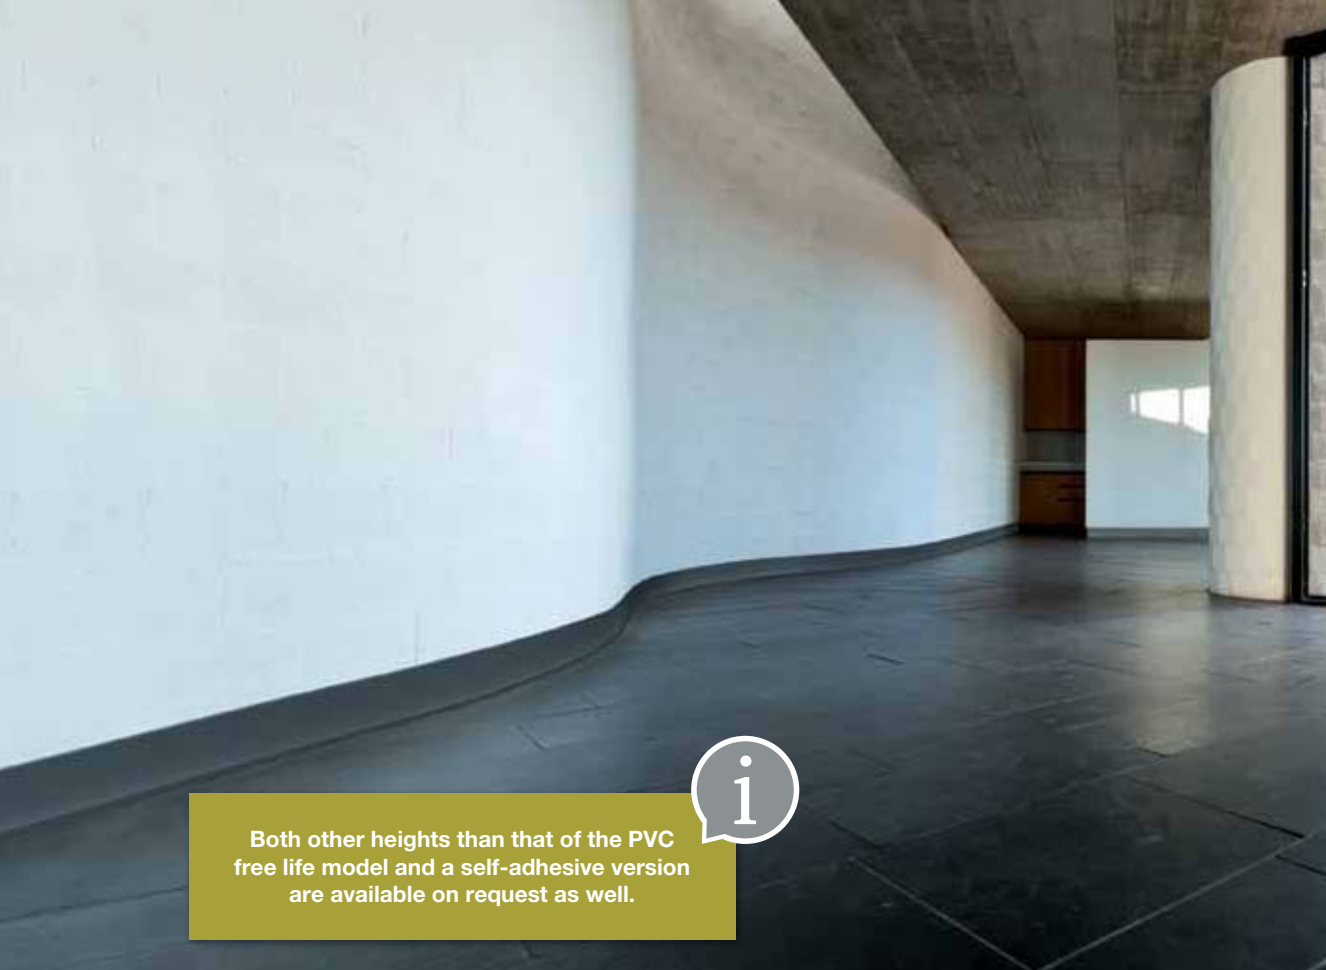

The easiest method for quickly performing a fit-out of the floor

Flexible floor plinth blocks are particularly well suited to use together with flexible PVC floorings.

Their installation is quick and easy, and the connection between wall and floor harmonious. These plinths comply with the REACH regulation and do not contain harmful softening agents.

Stair profiles and auxiliary profiles

Sturdy and reliable

Reliable protection of high traffic areas

Provide on elegant finish of passages or protect different kinds of floorings on staircases. A large choice of sizes and Decors of universal stair profiles enable reliable and sturdy fit-out of stair, near-stair and wall surfaces. These profiles comply with the REACH regulation and, therefore, do not contain harmful softening agents.

Wooden skirting

High-quality wooden skirting from Döllken Weimar.

Clear shapes – beautiful decor – multiple applications

Döllken Weimar also applies its many years of experience and expertise to the natural material timber. High-quality materials are used to create skirting boards that combine aesthetics, quality and durability. The PEFC und FSC certificates document the environmental credentials of raw materials used, and the various shape and decor options meet every aesthetic requirement. We have products available that extend beyond our standard range and would be happy to advise you.

Kitchen worktop wall joint trims

Design and functionality

Professional worktop finishes

Professional finishes of kitchen worktops, perfectly covering expansion joints and gaps. Easy and, at the same time, modern, with harmonious shape, and of the highest quality.

Easy to install, they will protect every gap from water penetration, at the same time protecting the worktop. Aesthetics and practicality combine into one cohesive whole.

Tools

Quick and easy
assembly and installation

Easily overcome difficult challenges

A quick work pace that guarantees workmanship quality and reliable installation of mounted floor skirtings are standard requirements for artisans. In order to meet this, Döllken offers a wide range of reliable tools. Furthermore, quick, clean and reliable fixing is provided by our efficient hot-melt adhesive system.

Mitre tool Type 1001

For all Döllken HDF-core skirtings boards

	Döllken Stanzen Bezeichnung	Product-Nr.
1	edge cutter type 1001	5105431
2	base plate for the cutter	5106890
3	double slot plate for cutter type 1001	5106892
4	vertical toggle clamp for universal cutter type 1001	5106893
5+6	grip with tongue	5106894
7	spare blade	5106896
8	blade guiding block	5106885
9	spare tongue	5106897
10	measuring templates	
11	cutter clamp for design floors	5105434
12	cutter casing (empty)	

All skirtings boards prepared for processing using the mitre tool are marked with an icon (shown).

- perfect for cutting all skirtings boards with cores
- easy to determine a cutting point
- enables cutting DSL 60 (external angle) skirtings boards using special Mitre tool overlays

The Mitre tool is also available as a set in a handy carry case.

The set includes:

- the case
- Mitre tool, Type 1001
- scissors for skirtings
- overlays for cutting skirtings boards for designed floors
- measurement template
- ruler

The aforementioned articles are also available separately.

* Cubu XL suitable for die cutting only with clamping lever XL.

* option to purchase spare parts

Replaceable clamp

For the mitre tool, Type 1001, for Cubu flex XL skirtings boards

For cutting Cubu flex XL skirtings boards

All skirtings boards prepared for installation using clamps are marked with an icon (shown).

Flooring strip cutter

Special cutter for exact and safe flooring strip cutting. Perfect for cutting modern PVC, CV and lino floorings. Strips with the width of 51 mm are placed in the D60 and C60 hard-core skirtings boards.

All skirtings to be cut using the strip cutter have this icon.

Cutter casing

Compact and well-organized!
The cutter is available also in
a complete casing set.

Hot-melt adhesive system

We highly recommend the complete system for professional bonding of thick skirtings with a core and system skirtings boards (please read the bonding manual) that includes:

- a HKP 220 hot-melt adhesive gun with a 4.5 m cable in a practical case
- HKS 18/300 hot-melt adhesive for application using the HKP 220 1VE gun:
 - 5 bags 2 kg each = 10 kg
 - quantity in the bucket:
 - colourless: 69 pcs. of adhesive
 - orange: 67 pcs. of adhesive

All skirtings boards prepared for installation using hot-melt adhesive are marked with an icon (shown)

Dry adhesive tape

In order to install various types of skirtings (please read the skirting installation manual), we also recommend using the UZIN installation tape (Toptac 35) available from Döllken.

Installation products from this manufacturer are perfectly suited to Döllken skirtings. Their use facilitates a secure, reliable and professional installation.

All skirtings boards prepared for installation using UZIN installation tapes are marked with an icon (shown).

Scissors for skirtings

For all Döllken skirtings

For detailed notching of skirtings boards and plastic profiles.

All skirtings boards prepared for installation using scissors are marked with an icon (shown).

Floorboard

Floorboard – perfect for floor laying and tiling as well as pointing and painting works.

FLOORBOARD, the unbreakable knee roller is a must for every professional who performs their work while kneeling. Even after hours is a fatigue-free work possible.

Why you need a floorboard:

- it protects the knees and the back
- it has multiple applications and optimum mobility
- it has a highly stable construction

Technical data: 57 x 33 x 9 cm (L x B x H)

Dimensions:

Load capacity: up to 150 kg

Weight: approx. 4 kg

Additional application possibilities:

Container holder: 30 x 40 cm (length x width) bulge for mixing bucket with a diameter up to 31.5 cm

Please send the repair tools to:
Döllken-Weimar GmbH,
Industriestraße 1, 59199 Bönen

Laminate underlays

Perfect utility

Perfect utility

Perfect acoustic insulation against unwanted sounds in rooms below, and reduction of noise when walking on our floorings. They perfectly level all surface irregularities and due to their properties, they perfectly meet the requirements of thermal insulation, which protects the room from losing heat. Underlay is recommended for laminated wooden floorboards and multi-layer wooden floor elements. Döllken floorings are also recommended for use with underfloor heating. Our floorings prevent fungi and moulds from expanding, and, at the same time, form a solid barrier against them, which has been confirmed by fungistatic tests conducted using the US EPA Pesticide Assessment Guidelines Subdivision method

Aluminium profiles

Universal perfection

Functional and aesthetic combination

Creating space and fitting out the interior of a house, home or office is the final stage of works, which provides finishing touches for the interior. It also influences our comfort. In order to meet the requirements of those who value both aesthetics and functionality, we offer you a wide range of aluminium profiles. Our rich assortment of aluminium profiles includes, transition skirtings boards, threshold skirtings boards and stair angles that perfectly complement arrangements of any interior. At the same time, they perfectly mask all joints and hide differences in height where floors connect.
